

Project Activity 3 – Social Coding

Team Name: _____

Social Coding Selection

Select the social coding application chosen by your team:

- Option 1: Feature enhancements of the Lab 4.9.2 code
- Option 2: New application – IPv4/IPv6 Address Application

What were the reasons your team selected this option?

Describe your team's application and its deliverables. What are the specific objectives of this application?

Record your team member roles and skillsets

Team member	Role/Knowledge/Skillset

Strategy/Project Plan

Provide a brief description of your team's strategy for completing this project.

Using GitHub for Collaboration

What is the link to your GitHub repository?

Describe how GitHub was used to:

- a. Create branches

- b. Add team members

- c. Do pull requests, code review, merge, etc.

Final Deliverables

Presentation

Create a presentation about the project you selected. Your presentation should include:

- Information about your application, covering what features your team included
- The reasons that your team decided on these specific features in your application
- Application code including comments and documentation. Your comments and documentation should be sufficient for any other team to be able to continue the project if required. Another team should be able to understand the application, your features and how to continue with the project
- Demonstration of the application
- List of future enhancements (backlog)
- Reflection points – what issues have you faced while working on this activity, how did you find solutions, what have you learned, etc.
